WATER FIRST

HANG IT WHERE
YOU KEEP THE WATER

Store it before you need it. Know what to do when the tap can't be trusted.

1
MINUTE AT A ROLLING BOIL

8
DROPS OF BLEACH PER GALLON

30
MINUTES BEFORE YOU DRINK

How much to store

1 gallon × people × days. 3 days minimum. 2 weeks if you can.

_____ × _____ = _____
PEOPLE DAYS GALLONS

Example: 4 people × 3 days = 12 gallons. Add more for pets, heat, and anyone nursing or sick.

Keep it good

- ☐ Sealed bottled water, or food-grade containers
- ☐ Cool, dark, away from fuel and chemicals
- ☐ Home-filled water: label the date, replace every 6 months

STORED AT _____

FILLED ON _____

If the water may be unsafe · in this order

1 · Check, then STOP if…

…officials say **do not drink**, or it smells of fuel or chemicals. Boiling, bleach and filters can't fix that. Use another source.

2 · Sealed bottled water first

For drinking, cooking, brushing teeth, washing food, and baby formula.

3 · Boil

BEST METHOD

Cloudy? Let it settle or strain through a clean cloth first. Rolling boil **1 minute**. Above 6,500 ft: 3 minutes. Cool, then cover.

4 · Bleach

NO HEAT? DO THIS

Plain unscented bleach, 5–9%. Never scented, splashless, or mixed with cleaners. Clear: **8 drops/gallon**. Cloudy: 16. Stir. Wait 30 min.

5 · Filter

ONLY IF LABELED

Use one labeled to remove parasites. Most don't stop bacteria or viruses, so boil or bleach after.

THE IDEA IS THE ART. THE HELP IS THE POINT. **fancyape.com**
